Ranch Rail Gate Installation Instructions

2-Rail, 3-Rail, 4-Rail and Crossbuck

Read all instructions prior to installing product.

Refer to manufacturers safety instructions when operating any tools.

WARNING:

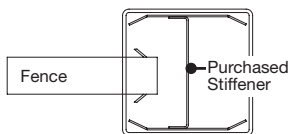

- Improper installation of this product can result in personal injury. Always wear safety goggles when cutting, drilling and assembling the product.
- Incorrect installation may cause harm to the product or individual.
- Not pool code approved.
- Do not allow children to play with the gate.

NOTICE:

- DO NOT attempt to assemble the kit if parts are missing or damaged.
- For assistance call: 1-888-723-7761.

BEFORE YOU BEGIN:

Vinyl gate posts require an internal support system for weight-bearing purposes, therefore a post stiffener is required. Post stiffener needs to be purchased separately.

1.

- a. Apply provided vinyl cement to all inside surfaces of the uprights where the rails will be installed (Fig. 1).
- b. Insert bottom rails into upright routes (Fig. 2).

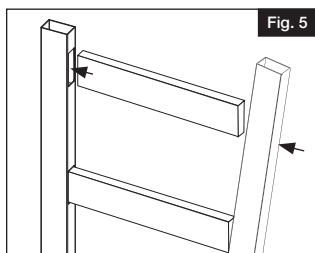

NOTE:

- For 3-Rail and 4-Rail gates, top and bottom rail are same size, middle rails are longer.
- Some Post & Rail gates will have middle rails. Insert the middle rails into both upright routes at this time (Fig. 3 & 4). Middle rail will install flush against the upright.

2.

Install top rail into both upright routes (Fig. 5).

3.

Measure diagonally from top of left corner rail (A) to bottom of right corner rail (B) and note the length. Then, measure diagonally from top of right corner rail (C) to bottom of left corner rail (D). Note the length. Make sure both measurements are the same before installing screws into uprights (Fig. 6).

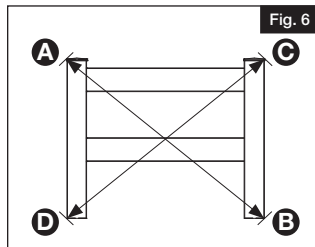

Fig. 6

4.

Install two 6" screws through each upright insert and into the rail using the molded grooves on the insert as a guide (Fig. 7).

NOTE:

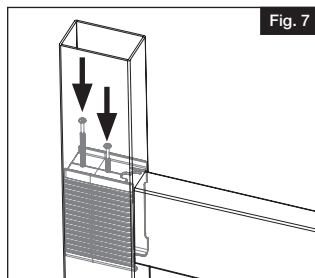

Fig. 7

5.

Install upright caps onto the top of each upright with provided vinyl cement (Fig. 8).

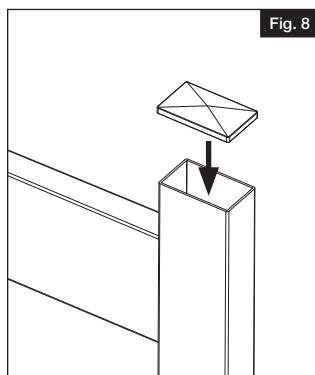

Fig. 8

6.

Install hinges according to hardware instructions.
